

REMARKS

The specification has been amended to insert SEQ ID NOs for the sequences on pages 15-17 and 20-21. No new matter has been introduced by these changes.

A substitute drawing for Figure 10 is enclosed for the Examiner's review and approval. As the only change is the addition of a SEQ ID NO for the amino acid shown therein, it is believed that this correction will be approved and that the drawing will be entered.

Claims 1-30, 46-52 and 55, as amended, and new claims 56-65 appear in this application for the Examiner's review and consideration. The dependency of claims 47-49 have been corrected to refer to claim 46 rather than claim 45. New claims 45-65 are supported by the specification as well as previous claims 6-15. As these changes do not introduce new matter, their entry at this time is warranted.

In response to the restriction requirement, applicants elect, with traverse, the invention of Group I, claims 1-5, 24-30, 46-52 and 55 drawn to a clonal lentogenic oncolytic strain of Newcastle Disease Virus. The applicants expressly reserve their right to file one or more applications directed to the subject matter of the other claim groupings. In addition, as claims 6-14 now depend from claim 1, these claims should be rejoined when claim 1 is allowed. Similarly, claim 56 should be rejoined when claim 55 is allowed and claims 57-65 should be rejoined when claim 46 is allowed. It is respectfully submitted that the restriction be withdrawn as to claims 6-14 and the new claims, but if not, it is anticipated that these claims be rejoined due to their dependency from elected claims.

Respectfully submitted,

9-14-05
